

NeuroNexus

Empowering discovery in the life sciences

Microfabrication Engineering Specialist

NeuroNexus seeks to hire an experienced microfabrication engineer to help expand our microfabrication capacity to support the increasing demands of worldwide dissemination of implantable neural and cardiac microelectrode technologies. The successful candidate will join a fast-growing team of engineers and scientists located in Ann Arbor, Michigan and Boston, Massachusetts. The candidate will focus on work that involves silicon/semiconductor wafer processing including photolithography, wet and dry etching, PVD/CVD, metallization, metrology and inspection. NeuroNexus offers an exceptional compensation and benefits package commensurate with the candidate's background and experience.
