## **Introducing X-Series: High-value, professionally engineered electrophysiology tools**

*– New offerings add new, cost-effective flexibility to NeuroNexus’ Summa Framework supporting electrophysiology data acquisition –*

**Ann Arbor, Michigan – November 7, 2022** – NeuroNexus, a pioneering neurotechnology company, today announced that it is teaming with KonteX, a Taipei-based high-tech engineering firm, to provide neuroscience researchers a powerful new series of innovative, highly engineered electrophysiology tools to streamline and accelerate research studies while saving time and money. These new tools – referred to as “X-Series” headstages, instrumentation, and accessories – fully integrate with NeuroNexus’ existing electrodes, instrumentation, Radiens™ software, and accessories to provide ready-to-go solutions that can power and de-risk existing workflows while aligning with the latest open-neuroscience protocols. Synergies between the next-generation X-series tools by KonteX and NeuroNexus’ best-in-class products and services further establish NeuroNexus as the eminent leader and trusted outfitter of electrophysiology labs and facilities around the world.

### **About NeuroNexus Inc.**

NeuroNexus is a pioneering neurotechnology company providing life science researchers with confidence in their data from the neural interface to the user interface and beyond. Our team of neuroscientists and neuroengineers have a collective 300+ years of electrophysiology lab experience and constantly innovate to excel neuroscience to the next level. NeuroNexus is based in Ann Arbor, Michigan, with operations in Boston, Massachusetts, and is the operating company of the NEL Group, Inc. ### **About KonteX Neuroscience**

KonteX is a Taipei-based neurotechnology startup focused on developing highly integrated, performance-optimized tools at competitive prices. KonteX was founded by ex-NeuroNexus co-founder KC Kong and is supported by industry veterans from

telecommunication, medical instrument, PC ODM/OEM, semiconductor, and packaging. KonteX is positioned to leverage the technical and engineering expertise from the Taiwanese tech industries to bring innovative approaches to solve neurotechnology and other cross-disciplinary challenges.
